

Mobina

Mohammad Hoseini lalani

EDUCATION

B.Sc. in Computer Science
Alzahra University
2020 – 2023

SKILLS

React.js & React Query
TypeScript
HTML5 & CSS3
JavaScript (ES6+)
Tailwind CSS & Bootstrap
RESTful API Integration
State Management (Redux, Zustand)
Responsive & Adaptive Design
Next.js
Version Control (Git)
Nest.js

PROFILE

Frontend Engineer with more than 4 years of experience building scalable, API-driven web applications using React, TypeScript, and modern state management tools. Specialized in designing high-performance **dashboards**, **CRM systems**, and **logistics platforms** with strong focus on usability, responsiveness, and data accuracy. Experienced in collaborating with cross-functional teams and integrating complex backend systems (.NET Core APIs). Passionate about clean architecture, UI performance optimization, and delivering production-grade user experiences.

EXPERIENCE

Nona Studio Startup

Frontend Developer | January 2024 - until now

- Built a scalable logistics dashboard platform using **React**, **TypeScript**, **Tailwind CSS**, **Redux**, **Zustand**, and **React Query**
- Designed and implemented real-time tracking UI modules and dynamic form systems for operational workflows
- Integrated complex C# .NET REST APIs for live data synchronization across logistics pipelines
- Improved UI responsiveness and data consistency across multi-role dashboards (admin, operator, manager)
- Collaborated closely with backend and design teams to ship production-ready features in iterative cycles

Fanavaran Sepehr Fardad

Frontend Developer | August 2022 -January 2024

- Developed a CRM web application with **React**, **TypeScript**, and **Tailwind CSS**
- Built reusable UI components for **dashboards**, **analytics views**, and **role-based access modules**
- Integrated REST APIs using C# .NET Core backend services
- Improved application performance and reduced UI re-rendering overhead through optimized state management
- Delivered scalable UI architecture supporting multi-department workflows

PoyandeganRahSaadatco

Frontend Developer | April 2020 - August 2022

- Developed internal enterprise web applications (CRM, invoicing, after-sales systems) using **JavaScript**, **HTML**, **CSS**, and **Bootstrap**
- Built responsive dashboards and reporting interfaces for operational teams
- Worked closely with backend engineers to integrate APIs and validate data flows
- Improved workflow efficiency through UI automation and form optimization
